

Concrete in construction

A collection of BRE expert guidance on concrete materials, applications and performance

Introduction

Welcome to the BRE Expert Collections.

IHS BRE Press is the exclusive publisher of BRE publications. Publications are produced in various series, which are outlined below. Information on how to purchase BRE publications is given on the next page, together with information about BRE and IHS.

This pdf contains a valuable collection of short BRE publications on concrete materials, applications and performance. It is one of a series of collections of BRE expert guidance and advice on the built environment, each offering exceptional value for construction professionals.

Adobe Acrobat Reader X or later for Windows or Macintosh is required to run this pdf. The pdf can be searched using the bookmarks panel and the links from the emboldened text on the Contents pages.

BRE publication types

Digests are authoritative summaries of the state-of-the-art on specific topics in construction design and technology. They draw on BRE expertise and provide essential support for all involved in design, specification, construction and maintenance.

Information Papers summarise recent innovation and research findings, and give advice on how to apply this information in practice.

Good Building Guides give concise guidance on the principles and practicalities of achieving good-quality building. These highly illustrated practical guides draw on BRE experience and research, and other sources, to provide clear technical advice and solutions.

Good Repair Guides are an extensively illustrated series, providing practical information on the identification, diagnosis and repair of defects. Good Repair Guides look at what went wrong, explain why, and give practical advice on how to put it right.

Books, reports and manuals present research, innovation, best practice and case studies in more detail.

BRE Connect Online is an online subscription to **all** BRE publications. Information about BRE Connect Online is included [HERE](#).

Buying BRE publications

Mail: IHS BRE Press, Willoughby Road, Bracknell RG12 8FB, UK

About BRE

BRE Group (BRE) is a world-leading centre of built environment expertise, research and training, and includes a third-party approvals organisation offering certification of products and services to international markets.

BRE is owned by BRE Trust, the largest UK charity dedicated specifically to research and education in the built environment. BRE Trust uses the profits made by BRE to fund new research and education programmes that advance knowledge, innovation and communication for public benefit.

Information about BRE can be found [HERE](#).

About IHS

IHS (NYSE: IHS) is the leading source of information, insight and analytics in critical areas that shape today's business landscape. Businesses and governments in more than 165 countries around the globe rely on the comprehensive content, expert independent analysis and flexible delivery methods of IHS to make high-impact decisions and develop strategies with speed and confidence. IHS is the exclusive publisher of BRE publications.

IHS Global Ltd is a private limited company registered in England and Wales (no. 00788737).

Registered office: Willoughby Road, Bracknell, Berkshire RG12 8FB. www.ihs.com

Information about IHS can be found [HERE](#).

Contents

Applications and constituents

Concretes with high ggbs contents for use in hard/firm secant piling	IP 17/05
Marine aggregates in concrete	DG 507
Self-compacting concrete	IP 3/04
Silica fume in concrete	IP 5/09

Low carbon concrete solutions

Alkali-activated binder concretes in construction: an introduction to their benefits and properties and barriers to use	IP 4/11
Alkaline ash binders: reduced environmental impacts for precast concrete products	IP 9/10
Applications, performance characteristics and environmental benefits of alkali-activated binder concretes	DG 530
Cements with lower environmental impact	IP 7/08
Durability of alkali-activated binder concretes: early age performance data	IP 5/13

Performance and management of built assets and structures

Alkali-silica reaction in concrete:	
Part 1 – Background to the guidance notes	DG 330-1
Part 2 – Detailed guidance for new construction	DG 330-2
Part 3 – Worked examples	DG 330-3
Part 4 – Simplified guidance for new construction using normal reactivity aggregates	DG 330-4
Assessing the fire performance of existing reinforced concrete flooring systems	IP 9/12
Asset management and service life of concrete structures and components: potential benefits of emerging data capture and management technology	IP 26/12
Carbonation of concrete and its effect on durability	DG 405

BRE Expert Collections

The BRE Expert Collections provide compilations of BRE Digests, Good Building Guides, Good Repair Guides and Information Papers on specific built environment topics. Each collection gives guidance and advice from industry experts at BRE and offers exceptional value for construction professionals.

- 1 Concrete in construction**
A collection of BRE expert guidance on concrete materials, applications and performance
- 2 Timber in construction**
A collection of BRE expert guidance on timber materials, applications and performance
- 3 Climate resilience**
A collection of BRE expert guidance on managing climate risks in the built environment
- 4 Resource efficiency, site operation and handover**
A collection of BRE expert guidance on construction site operation and management
- 5 Air quality, radon and airtightness**
A collection of BRE expert guidance on the design and construction of new and existing buildings
- 6 Daylight and shading**
A collection of BRE expert guidance on designing for daylight and sunlight, and shading of buildings

More BRE Expert Collections coming soon:

- Condensation and dampness
- Energy
- Fire and security
- Sustainability and green issues

focus on **design**

Be **safe, secure** and **compliant**
with this title from IHS BRE Press

NEW

Design of durable concrete structures

Stuart Matthews

Explore the complex phenomena governing durability and long-term performance of concrete structures and how this forms a basis for service-life design. While consideration is given to concrete as a material, the focus is on the behaviour of the concrete structure and its interaction with its environment.

Based on international research and experience, this well illustrated and thoroughly referenced book provides valuable support for the latest thinking on concrete durability and service-life design.

It will not only assist the designer to improve the future durability performance and reliability of concrete structures, but will also assist engineers involved with the assessment, maintenance and extension of life of existing concrete structures.

focus on **design**

Be **safe, secure** and **compliant**
with these titles from IHS BRE Press

Handbook for the structural assessment of large panel system (LPS) dwelling blocks for accidental loading

Get new guidance on the structural assessment and strengthening options for large panel system (LPS) dwelling blocks, focusing primarily on their resistance to accidental loading associated with gas explosions. BR 511

Concrete usage in the London 2012 Olympic Park and the Olympic and Paralympic Village and its embodied carbon content

Explore the concrete supply strategy for the Olympic Park and the Olympic and Paralympic Village, including how it reduced embodied carbon emissions of the facilities and infrastructure, and influenced the carbon footprint of the London 2012 Games. FB 49

Concrete in aggressive ground

Practical guidance on ground assessment and the specification of concrete for installation in natural ground and in brownfield locations. SD 1

ALSO AVAILABLE

Structural appraisal of existing buildings, including for a material change of use

Get comprehensive guidance with this 4-part BRE Digest on the structural appraisal of existing buildings: overall regulatory requirements, the factors that might influence the outcome of an appraisal, appraisal procedures, additional considerations and information sources. DG 366 (4-part set)

Responsible sourcing of materials in construction

Concise straightforward guidance on how to go about the responsible sourcing of construction products. It gives an update of a fast-moving area for anyone who owns or is accountable for the construction, refurbishment or maintenance of buildings. IP 3/13

Calcium aluminates

The proceedings of the international conference on calcium aluminates held in Avignon, France, in May 2014 with papers from Europe, Canada, USA, Japan, Brazil, Australia and South Africa. EP 104

Order @ www.brebookshop.com or phone +44 (0) 1344 328038

Available in print and pdf format

focus on building elements

Build to last
with the BRE Building Elements series

The BRE Building Elements series provides more than 1500 pages of extensively illustrated practical details, descriptions and best practice advice provide an essential reference for all building professionals.

Roofs and roofing

Learn about the materials and production methods used to construct roofs and roofing. Focus on the features that ensure good performance and the things that go wrong so that they can be avoided. **3rd edition**
BR 504

Floors and flooring

Find out what to look for as good and bad features of floors and flooring. Get guidance on all floors, including screeds and underlays, as well as a range of finishes.
BR 460

Foundations, basements and external works

Review practical details and best practice about those parts of buildings in direct contact with the ground: foundations, piles, basements, drains, supply of utilities and boundary walls. BR 440

Building services

Explore the gamut of fuelled, piped, ducted, wired and mechanical facilities which extend over the whole age range of the UK's building stock. BR 404

Walls, windows and doors

Get practical guidance on the main vertical building elements, both external and internal, including walls, windows, doors, separating walls, partitions and internal doors. BR 352

Understanding dampness

Identify the causes of dampness, explore its effects and learn how to provide remedial measures. Discover how to tackle problems that exist in spite of all the available technical advice. BR 466

Order @ www.brebookshop.com or phone +44 (0) 1344 328038

Available in print and pdf format and as individual books or as a set of 6
Quote ref. **AP 243** to buy all 6 books for £195 (a saving of £85!)

BRE Connect Online

Build on your foundation of **knowledge** and **expertise**

WHAT IS BRE CONNECT ONLINE?

BRE Connect Online gives you **access to the unrivalled expertise and insight of BRE** – the UK's leading centre of excellence on the built environment.

BRE Connect Online is an **annual subscription service** from IHS BRE Press giving online access to **over 1700 new and published BRE titles**

WHAT DO I GET?

ALL NEW AND PUBLISHED BRE TITLES

700 books, reports and guides – research, innovation, best practice and case studies, including:

- Foundations, basements and external works
- Roofs and roofing
- Site layout planning for daylight and sunlight
- The Green Guide to Specification
- Understanding dampness

250 Digests – authoritative state-of-the-art reviews

600 Information Papers – BRE research and how to apply it in practice

150 Good Building and Repair Guides – illustrated practical guides to good building and repair work

AND MUCH MORE ...

WHAT'S NEW IN 2015?

MORE THAN 50 NEW TITLES, INCLUDING:

- A technical guide to district heating
- Building on fill (new edition)
- Building in security at the design stage
- Dealing with damp and condensation
- Innovation in sustainable buildings
- Lighting and health
- Passive fire protection systems
- Radon: Guidance on protective measures for new buildings (new edition)
- Soakaway design (new edition)

All this for an annual subscription of only **£399 + VAT**
